

When borrowers do not share assets and liabilities or there are more than 2 borrowers.....

All loan files automatically start with one application, and additional applications can be added when needed. Each application has up to 2 borrowers.

This example has two applicants on the first application and if “Add Another” is selected, another application for up to two more borrower will be added to the input tree.

If borrowers do not share assets and liabilities each borrower can be on a separate application. This example has 3 borrowers, 1 individual and 1 joint application is needed, because borrowers 2 and 3 share joint
